DREAMPATH diagnostics

Traceability Fully Automated

Sort, find, retrieve and re-archive blocks and slides

FAST, SECURE and SAFE

Visit us at
www.dreampathdx.net

Did you know?

- The staff of a lab of about 100,000 blocks spends an average of 3,500 hours per year sorting, retrieving and re-archiving blocks? That's **2 full time** employees[1].

[1]University Hospital of Wales Cardiff, Scott Gable, 2016.

Stop losing samples

- Today **0.05%** of blocks and **0.02%** of slides get lost every year. That's potentially over 50 patients per year[2].

[2]Maintaining Clinical Tissue Archives, Arch Pathol Lab Med 2011 135:347-353 , Caterina Giannini MD PhD Mayo Clinic.

REMEMBER: the sample that get's lost is always the most precious one.

Increase your capacity

Reduce drastically time spent archiving blocks and slides.

- Archive 500 blocks in less than 15 minutes.
- Archive 1,000 slides in less than 30 minutes.

Optimize space

With our technology you don't need to leave gaps in your drawers for blocks and slides.

Our solutions optimize your space:

- Example: archive 134,000 slides in a unique position each in just 1 linear meter.

Traceability fully automated

Our technology allows you to know:

- Who took your sample.
- Why.
- For how long.
- When should it be returned.

Track samples that are overdue.
